RE: Ossipee Lake Marina

Today I visited the Marina at your request to count the number of boats present outside of the buildings. I met with Tim Cupka, Manager, who explained the categories of boats which were there. I have counted the boats on the property and submit the following numbers per category:

Marina owned boats	Client boats for servicing	Outside storage client boats
101	19	23

Marina owned boats include new and pre-owned boats for sale. The other two categories differ in that the boats there for servicing are not paid to be stored and are to be picked up whenever they have been worked on. The boats for storage are not there to be worked on but are covered for the winter and there for the season.
