FREEDOM ZONING ORDINANCE  
FREEDOM, NEW HAMPSHIRE

ARTICLE 1            PREAMBLE AND TITLE

Section 101            Preamble

In pursuance of authority conferred by New Hampshire Revised Statutes Annotated, Chapter 674, Section 16, for the purpose of promoting the health, safety and general welfare of the inhabitants of the Town of Freedom, now therefore the following ordinance is hereby enacted by the voters of the Town of Freedom, New Hampshire.

Section 102            Title

This ordinance shall be known and may be cited as the "Zoning Ordinance of the Town of Freedom, New Hampshire, 1987."

Section 103            Land Use Limited to Specific Listed Uses

No structure shall be constructed, erected, placed, or maintained and no land use commenced or continued within the Town of Freedom except as specifically or by necessary implication authorized by this Ordinance. There is no provision for any private solid waste facility. Only a municipal solid waste facility may exist in Freedom to serve the Town. In the adoption of this Ordinance, which excludes certain uses of land, the voters have considered the unique topography of the Town, its soils, the lack of central water and sewer systems, and the present character of the Town.

ARTICLE 2            EXISTING USES

Section 201

Any lawful building, or use of a building, or land, or parts thereof in existence at the time of the adoption of this Ordinance, or of any amendment thereto, may be continued although such building or use does not comply with the provisions herein. Such building or use shall be lawful if there was compliance with existing Regulations in effect. This Zoning Ordinance shall not apply to existing structures or to the existing use of any building or land. It shall, however, apply to any alteration of an existing structure or for a use which is substantially different from the existing use or from the existing structure prior to alteration. Nonconforming uses and structures shall be subject to the provisions of Article 5, Non-Conforming Uses and Structures.

GR	General Residential
RR	Rural Residential
LC	Light Commercial
SF	Shore Front
W	Wetland Conservation Overlay District

Amended 3/13/90

Section 302                    Zoning and Wetland Maps

The districts as established in Section 301 are shown on maps on file in the offices of the Town of Freedom which maps are a part of this Ordinance. There is a map entitled "Town of Freedom Zoning Map" which has been identified by the signatures of the members of the Planning Board and the date of adoption and any further amendments. See also Appendix A for a word description of the boundaries shown on the Zoning Map. There are also two (2) maps relating to the Wetlands Conservation Overlay District, namely the Freedom Wetlands Map and the Wetlands Conservation Map. Both of these maps are on file in the offices of the Town.

Section 303                    District Boundaries

A district boundary shown on the zoning map or described on Appendix A as approximately following the center line of a street or road, or a shoreline of a body of water, shall be construed as following such line. If the district classification of any land is in question, it shall be deemed to be in the most restrictive adjoining district.

Section 304                    District Objectives and Land Use Control

The following tables establish the objectives of each of the districts established above and the provisions of the regulations that apply respectively in each district. Any use designated as a "Permitted Use" in the table referring to a particular district may be commenced in such district pursuant to Section 305. Any use designated as a "Special Exception" in the table referring to a particular district may be commenced in such district pursuant to Section 306. Explanation of lots, dimensional requirements, accessory uses and application of District Regulations affecting all uses are found in Sections 307-312 inclusive.

304.5 TABLE "SF" SHORE FRONT DISTRICT  
for Lakes & Ponds over 10 acres & Ossipee River

Objective

Most of the land immediately adjacent to Freedom's lakes, ponds and rivers is overlaid by soil types which are characterized by erosion and drainage hazards. These lands require conservation and land management practice which minimize environmental and aesthetic degradation.

The following restrictions are applicable to land within the designated Shore Front District. They are designed to protect and enhance water quality, prevent overcrowding of shore land in the interest of public health and safety, and to preserve the natural beauty and wildlife habitat of the waterfront areas in the Town.

Location of the Shore Front District

The Shore Front District is an environmental overlay district super-imposed over the zoning district shown on the zoning map. This overlay district extends from the normal high water level on all lakes and ponds over 10 acres and the Ossipee River, to a point 300 feet inland. The following uses are allowed in addition to the uses allowed in the underlying district.

- 304.6.1.2            The shore front common area shall have a minimum of 200 feet of shore frontage for the first dwelling unit and an additional 20 feet of shore frontage for each additional unit more than one. The plan shall describe the nature and purpose of the land disturbing activity, the amount of grading involved, a description of soils, topography, vegetation and drainage. The Zoning Board of Adjustment shall review all plans before construction begins and determine that erosion and sedimentation will be reasonably controlled to avoid undue adverse impact. The ZBA may require the applicant to post a bond or other security to assure conformance with approved plans. ARTICLE A3                    WETLANDS CONSERVATION OVERLAY DISTRICT

Article A3 amended 3/13/90

Section A301                    Purpose and Intent

The purpose of these regulations is to protect the public health, safety and general welfare by controlling and guiding the use of land areas which have been found to be subjected to high water tables for extended periods of time.

It is intended that these regulations shall:

1. Prevent the development of structures and land uses on naturally occurring wetlands which will contribute to pollution of surface and ground water by sewage or toxic substances.
2. Prevent the destruction of, or significant changes to, natural wetlands which provide flood protection.
3. Protect unique and unusual natural areas.
4. Protect wildlife habitats and maintain ecological balances.
5. Protect potential water supplies and existing aquifers (waterbearing stratum) and aquifer recharge areas.
6. Prevent expenditure of municipal funds for the purposes of providing and/or maintaining essential services and utilities which might be required as a result of misuse or abuse of wetlands.
7. Encourage those low-density uses that can be harmoniously, appropriately and safely located in wetlands.

Section A302                    Wetlands Defined

Wetlands are areas where a significant part of the vegetational community, and soil and land types consist of, but do not necessarily include all, of the following:

1. Swamps are areas where the water table is at or near the ground surface for a significant part of the year. The vegetational community consists mostly of trees and woody shrubs, such as:

FREEDOM ZONING ORDINANCE

Section A302 (continued)

Alders	Poison Sumac
Arrow-wood	Red Maple
Atlantic White Cedar	Rhodora
Black Ash	Sphagnum Moss
Black Gum	Spicebush
Black Spruce	Sweet Pepperbush
Buttonbush	Tamarack (Larch)
Common Elder	Willows
High-bush Blueberry	Winterberry
Marsh Rose	

2. Marshes are treeless wetlands dominated by soft-stemmed herbaceous plants. The surface of the marsh is covered with water year-round, though seasonal fluctuations in water depth are expected. Marshes range from the wet meadows variety to deep marshes which can be covered with several feet of water. The vegetational community is made up of some or all of the following:

Arums	Pickerel Weeds
Bladderworts	Rushes
Bur-reeds	Sedges, including
Cat-tails	Bulrushes, Cotton-grasses
Duckweeds	Wool-grasses
Eelgrass	Smartweeds
Frog's-bits	Sweet Gale
Horsetails	Water-lilies
Hydrophylus Grasses	Water Milfoil
Leatherleaf	

3. Bogs consist of peat or muck deposits of significant depths and are characterized by a distinct group of trees and plants which are adapted to the bogs highly acidic conditions. The water in a bog is practically devoid of oxygen and nutrients. Bogs usually develop in undrained glacial depressions. Typical plants are:

Atlantic White Cedar	Pale Laurel
Black Spruce	Pitcher-plants
Bladderworts	Rhodora
Bog or Buckbean	Sedges
Bog-laurel	Sheep Laurel
Bog-rosemary	Spagnum Moss
Cotton Grass	Sundews
High-bush Blueberry	Sweet Gale

"Very Poorly Drained" soils include:

Alluvial land, west (AW)	Muck and Peat (MU)

Naumburg loamy sand (Na)  
Raynham variant (Ra)  
Ridgebury series (Rg) (Rl)

Section A303            District Boundaries

1.    Wetlands Conservation Overlay District Defined

The Wetlands Conservation Overlay District is an environmental overlay district superimposed over the Zoning districts shown on the Zoning Map. The Wetlands Conservation Overlay District is defined as those areas delineated as very poorly and poorly drained soils by the U.S. Department of Agriculture, Soil Conservation Service, in the Soil Survey of Carroll County, New Hampshire, dated December, 1977. The Wetlands Conservation Overlay District also includes those areas such as swamps, marshes and bogs that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support a prevalence of vegetation adapted for life in saturated soil conditions.

2.    Establishment of a District

The limits of the Wetlands Conservation Overlay District are hereby determined to be areas of one acre or more in size, or of any size if contiguous to surface waters such as lakes, ponds and streams, subjected to high water tables for extended periods of time and includes, but are not necessarily limited to, all such areas delineated as wetlands on the current Freedom Wetlands Map, which is on file at the Town Hall.

FREEDOM ZONING ORDINANCE  
FREEDOM, NEW HAMPSHIRE

Section A303 (continued)

3. Wetlands Incorrectly Delineated

In the event an area is alleged to be incorrectly delineated as being poorly drained or very poorly drained soils in the Wetlands Conservation Map, or that an area not so designated meets the criteria for wetlands designation, and evidence to that effect is satisfactorily presented to the Zoning Board of Adjustment, the Zoning Board of Adjustment may determine that the restrictions contained in this Ordinance shall or shall not apply. Such evidence may be obtained either by revision by the Soil Conservation Service of its soil maps or by adequate on-site soils investigation and analysis conducted by a Soils Scientist qualified in field analysis with such investigation and analysis to be reviewed by the Soil Conservation Service and presented in writing to the Zoning Board of Adjustment along with the findings of the Soil Conservation Service.

Section A304 Permitted Uses

1. Permitted uses are those which will not require the erection or construction of any structures or buildings, will not alter the natural surface configuration by the addition of fill or by dredging and uses that otherwise are permitted. Such uses may include the following:
  - a. Forestry-tree farming, using best management practices in order to protect streams from damage and to prevent sedimentation.
  - b. Cultivation, harvesting and fertilization of crops according to recognized soil conservation standards as established by the Soil Conservation Service. The protection of wetlands from pollution caused by fertilizers, pesticides and herbicides shall be of prime importance.
  - c. Wildlife refuges.
  - d. Parks and recreation uses consistent with the purpose and intent of this Ordinance.
  - e. Conservation Areas and nature trails.
  - f. Open spaces as permitted or required by the Subdivision Regulations and/or this Ordinance.

1.        Streets, roads and other access ways and utility right-of-way easements, including power lines and pipe lines, if essential to the productive use of land and if so located and constructed as to minimize any detrimental impact of such uses upon the wetland.
2.        Water impoundments.
3.        The undertaking of a use not otherwise permitted in the Wetlands Conservation Overlay District, if it can be shown that such proposed use is not in conflict with any and all of the purposes and intentions listed in Section A301 of this Ordinance.

Section A306            Septic Tank or Leach Field Setback

No septic tank or leach field may be constructed or enlarged closer than one hundred twenty-five (125) feet to any wetland. In the case of a failed system, the septic tank may be a minimum of fifty (50) feet from any wetland providing all joints are sealed and approval of Water Supply & Pollution Control Division is obtained to the extent required by law.

Section A307            Wetland Not Part of Minimum Lot

No part of a wetland may be considered as part of the minimum lot size under this Ordinance or the Subdivision Regulations.

Section A308            Conflict with Other Regulations

Where any provision of the Wetland Conservation Overlay District is in conflict with State law or other local regulation, the most stringent provision shall apply.

(Information Only: The adoption of this Zoning amendment repealed the Wetlands Conservation Ordinance adopted by the Town Meeting on March 11, 1979, effective March 13, 1990.)

conditions a literal enforcement of the provisions of the Ordinance will result in unnecessary hardship and so that the spirit of the Ordinance will be observed and substantial justice done. In so doing, The Board of Adjustment may attach such conditions and safeguards as it deems necessary to protect the neighborhood and the community.

Section 1805.1 (continued)

- D. In exercising the above-mentioned powers, the Board of Adjustment may reverse or affirm wholly or in part or may modify the order, requirement, decision, or determination appealed from and may make such order or decision as ought to be made and to that end shall have all the powers of the Zoning Officer from whom the appeal is taken.

FREEDOM ZONING ORDINANCE  
FREEDOM, NEW HAMPSHIRE

- A. No diminution in value of surrounding properties would be suffered;
- B. Granting the permit would be of benefit to the public interest;

FREEDOM ZONING ORDINANCE  
FREEDOM, NEW HAMPSHIRE

Section 1806.1 (continued)

- C. Denial of the permit would result in unnecessary hardship to the owners seeking it;
- D. By granting the permit, substantial justice will be done;
- E. The use must not be contrary to the spirit of this Ordinance.

In determining whether or not these standards are met, the Zoning Board of Adjustment shall find the following facts and so specify in its decision:

1. That there are unique physical circumstances or conditions including irregularity, narrowness, or shallowness of lot, size or shape, or exceptional topographical or other physical conditions peculiar to the particular property, and that unnecessary hardship is due to such conditions and not the circumstances or conditions generally created by the provisions of this Ordinance in the neighborhood or district in which the property is located.
2. That because of such physical circumstances or conditions the property cannot be used in strict conformity with the provisions of this Ordinance and that the authorization of a Variance is therefore necessary to enable the reasonable use of the property.
3. That the Variance if authorized will not diminish the value of surrounding properties.
4. That the Variance if authorized will represent the minimum Variance that will afford reasonable relief.

1806.2 In authorizing a Variance, the Board of Adjustment may attach such conditions and safeguards as it deems necessary to protect the neighborhood and community, as to the use of the land.

Section 1807 Fees

(1) Wetlands Conservation Overlay District Defined

The Wetlands Conservation Overlay District is an environmental overlay district superimposed over the Zoning districts shown on the Zoning Map. The Wetlands Conservation Overlay District is defined as those areas delineated as very poorly and poorly drained soils by the U.S. Department of Agriculture, Soil Conservation Service, in the Soil Survey of Carroll County, New Hampshire, dated December, 1977. The Wetlands Conservation Overlay District also includes those areas such as swamps, marshes and bogs that are inundated or saturated by surface or ground water at a frequency and duration sufficient to support a prevalence of vegetation adapted for life in saturated soil conditions.

Wetlands Conservation Overlay District (continued)

(2) Establishment of a District

The limits of the Wetlands Conservation Overlay District are hereby determined to be areas of one acre or more in size, or of any size if contiguous to surface waters such as lakes, ponds and streams, subjected to high water tables for extended periods of time and includes, but are not necessarily limited to, all such areas delineated as wetlands on the current Freedom Wetlands Map, which is on file at the Town Hall.

(3) Wetlands Incorrectly Delineated

In the event an area is alleged to be incorrectly delineated as being poorly drained or very poorly drained soils in the Wetlands Conservation Map, or that an area not so designated meets the criteria for wetlands designation, and evidence to that effect is satisfactorily presented to the Zoning Board of Adjustment, the Zoning Board of Adjustment may determine that the restrictions contained in this Ordinance shall or shall not apply. Such evidence may be obtained either by revision by the Soil Conservation Service of its soil maps or by adequate on-site soils investigation and analysis conducted by a Soils Scientist qualified in field analysis with such investigation and analysis to be reviewed by the Soil Conservation Service and presented in writing to the Zoning Board of Adjustment along with the findings of the Soil Conservation Service.
